IRS E-file Requirement

Beginning January 1, 2011, the IRS has mandated that tax return preparers who prepare more than 100 returns must prepare them to be filed electronically. In order to comply with this mandate, Kerkering Barberio will prepare all of its clients' income, estate and trust returns for them to be filed electronically, starting with 2010 returns filed in 2011. We have already been preparing many of these returns electronically for several years now, and it is an easy process for our clients: Simply review the paper copy of your return that we provide for your records, sign the IRS E-file authorization form provided, and return it to us. We will then send the return electronically to the IRS.
