

Healthcare Services

In today's rapidly changing healthcare environment, medical practices must juggle rising overhead costs, declining reimbursements, complex regulatory mandates and higher individual risk. Operating a successful practice in this atmosphere requires the help of professionals who know your business.

KB Healthcare Consultants is dedicated to providing service to the healthcare industry including all physician specialties, non-physician practitioners, laboratory and ancillary services, ambulatory surgery centers, hospitals, and imaging centers. The Healthcare team consists of medical consultants, accountants, certified coders and certified compliance specialists.

Our clients receive insightful review and benchmarking of practice operations and access to "best practice" service solutions. We focus on enhancing profitability through expense management, revenue enhancement and operational efficiency.
